Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to method of making a transgenic monocot, classified in class 800 subclass 293, for example.
 - II. Claims 25-42 drawn to method of preparing green shiny, nodular, compact tissue from a monocot plant, classified in class 435, 410 subclass, for example.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different steps, different starting materials and different products. The Group I inventions require heterologous nucleic acids, steps of transformation selection using selective medium, and microparticle bombardment procedures for transformation. Group II inventions require different starting materials, such as immature embryos, and different steps, such as germinating a monocot seed, excising and discarding root and shoot tissue, and produce monocot plant tissue.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their

recognized divergent subject matter, and their requiring different searches, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
